KingCoat™ **Powder Coating Solution**

StressCrete
GROUP

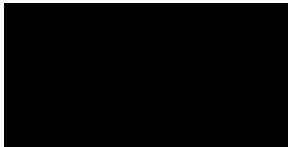

KingCoat™ Powder Coating

A super durable exterior polyester powder blend of non-volatile ingredients is applied dry and fused by heat. This service features excellent film appearance and adhesion, plus superior outdoor exposure qualities leading to outstanding corrosion and barrier protection. Our exceptional quality is guaranteed through a multitude of Quality Control procedures, which include 4000 hours of salt spray testing for steel, aluminum, cast iron and cast aluminum.

Our finishing options provide reliable protection, have outstanding chemical resistance, excellent hardness, and are available in a wide variety of colors. Whether you select a standard or premium color, finishes are available in both textured or smooth. Color matching is available upon request, for specific customer requirements.
